

OSZ 110

PNEUMATIC DRIVE

Powerful and exact!

When power is what matters and the defined cutting depth is irrelevant, the OSZ is the right tool for the job. Hard, tough materials such as honeycomb can be processed, but even soft materials such as foams are no problem. Materials can be processed with a stroke of approx. 7 mm and a cutting depth of up to 200 mm. The drive can be used for a wide variety of materials such as **cork, leather, foams, cardboard, corrugated cardboard, honeycomb, rubber** and **sealings**.

- High precision and repeatability
- Strong cutting force in many materials
- Stroke up to 9mm for high performance

2 different knife holders

- 6mm round shank
- 8mm round shank

Details

Stroke	7-9mm	-> 0,31 in
Stroke frequency	9.000min ⁻¹	
Concentricity accuracy	0,2mm	-> 0,08 in
Noise level	85 dB(A)	
Performance	Ca. 250 W (rated capacity)	
Operating pressure	6 bar	-> 87 psi
Air consumption	120 l/min	
Material	Stainless steel	
Weight	1,05 kg
